

B2

One particularly useful marine articles are phosphorescent marine caps. These marine caps can mount on tope of the buoy or dock post body. Figures 1-4 illustrate one embodiment of a preferred configuration of a marine cap. The overall appearance of the embodiment illustrated in Figures 1-4 is not exhaustive of appearances which are with the scope of the invention but are merely representative of one configuration which is ornamental but maintains some or all of the functional aspects of a marine cap of the invention. FIG. 5 represents a portion of the surface of a marine article including a phosphorescent phosphor according to the invention.
